Bianca

Designer: Simone Bellicini

“La contemporaneità del vetro soffiato”
“The contemporaneity of glass blowing”

DESIGN Il motivo principale è il cerchio, piatto o con volume che diventa una sfera appiattita. Un gioco di contrasti che scaturisce dalla prospettiva e dal colore. La vista laterale mette in risalto il contrasto di volumi tra il metallo e il vetro, mentre la vista frontale esalta le finiture.

PERSONALITÀ Bianca può essere applique o plafoniera, singola o in gruppo. Le diverse finiture, scelte attentamente tra le palette più contemporanee, dialogano armoniosamente tra loro anche nei toni più audaci. L'alluminio riciclabile della struttura e il led integrato sostituibile la rendono una lampada sostenibile.

MAESTRIA Vetro bianco latte soffiato nel nostro territorio è il materiale scelto come diffusore di luce per Bianca. Oggi come nel Rinascimento si utilizza la stessa tecnica della soffiatura nello stampo, patrimonio della cultura storica e imprenditoriale del Veneto.

DESIGN *The main subject is the circle, either flat or with volume that becomes a flattened sphere. A play of contrasts springing from the perspective and the colour. The side view highlights the contrasting volumes between metal and glass, the frontal view highlights the finishes instead.*

PERSONALITY *Bianca is available as wall lamp or ceiling one, single or a group. The several finishes, chosen carefully among the most contemporary palettes, talk to each-other harmoniously even in the boldest shades. The recycled aluminium of the structure and the replaceable built-in LED make the lamp sustainable.*

EXPERTISE *The milk-white blown glass from our territory is the material chosen as Bianca's light diffuser. Nowadays, as in Renaissance, the same mold-blown glass technique is used, since it is considered a historical, cultural and entrepreneurial heritage of Veneto.*
